Kasih Ibu Hospital Bali

Title

President

Location Indonesia

Biography

Mr. Krishnawenda Duarsa began his journey at Kasih Ibu Hospital Group by leading its early digital modernisation efforts. He introduced several first-in-Bali medical technologies and guided the Group to become the first hospital network in Bali to fully operate using an integrated EMR system, strengthening clinical accuracy and workflow efficiency. As President Director, he has enhanced the Group's credibility by achieving key international accreditations, including ACHSI and EMRAM Stage 6, which demonstrate adherence to recognised global standards. He also led the establishment of the International Patient Centre, improving coordination and service flow for foreign and domestic patients seeking streamlined care. Mr. Krishnawenda continues to drive the growth of multiple Centres of Excellence in the group, developed through a combination of international collaborations and internal clinical expertise. His ongoing focus is on applying technology, partnerships, and operational improvements to elevate patient services and overall hospital performance across the Group.

About the Organization

Founded in 1987 as a maternity clinic, Kasih Ibu Hospital evolved into a comprehensive general hospital by 1991. Today, its four strategically located facilities deliver exceptional medical care across Bali. Demonstrating a commitment to global standards, the hospital recently earned the prestigious ACHSI (Australian Council on Healthcare Standards International) accreditation.

Additionally, Kasih Ibu achieved HIMSS EMRAM Stage 6 validation, reflecting an advanced centralized EMR system that empowers precise, coordinated clinical decision-making. Patient care is further elevated through dedicated Pre-Hospital and International Patient Centres.

To advance its position as Bali's premier healthcare provider, Kasih Ibu has spent the last seven years forging international partnerships with world-renowned institutions. By collaborating on oncology care, elderly care, plastic surgery, sports medicine, and IVF, the hospital continuously elevates its clinical standards, proudly bringing world-class, digitally advanced healthcare to the region.
