National University Hospital

Title

Chief Medical Informatics Officer of National University Hospital and the Regional Health System Office

Informatics Leader of Kent Ridge Office of Innovation

 **Location** Singapore

Biography

Ling Zheng Jye is Chief Medical Informatics Officer of the National University Hospital and the Regional Health System Office, and Informatics Leader of the Kent Ridge Office of Innovation. He bridges clinical practice, digital health strategy, and healthcare innovation to advance data driven, patient centred care across the NUHS ecosystem. His work spans electronic medical records, analytics, and the governance and evaluation of emerging health technologies, in close partnership with clinicians, health system leaders, and industry. Key achievements include leading system level digital health and informatics initiatives such as electronic medical records and patient portals, and contributing to international academic exchange in population health, clinical informatics and healthcare innovation.

About the Organization

The National University Hospital (NUH) is Singapore's leading university hospital. NUH is the principal teaching hospital of the NUS Yong Loo Lin School of Medicine, founded in 1905. Our unique identity as a university hospital is a key attraction for healthcare professionals who aspire to do more than practise tertiary medical care. We offer an environment where research and teaching are an integral part of Medicine, and continue to shape medicine and transform care for the community we care for. We are an academic medical centre with over 1,200 beds, serving more than one million patients a year with over 50 medical, surgical and dental specialties. NUH is the only public and not-for-profit hospital in Singapore to provide trusted care for adults, women and children under one roof, including the only paediatric kidney and liver transplant programme in the country.
