

Dr. Luis Ramon V. Rodriguez

Company / Organization

Medical Device Association of the Philippines (MDAP)

Title

Chairman

 **Location** The Philippines

Biography

Dr. Luis Ramon V. Rodriguez currently serves as Chairman of the Medical Device Association of the Philippines (MDAP) and is a long-time leader in the Philippine healthcare and medical device sector. He has extensive experience in medical device distribution, health facility development, working closely with major private hospitals and key stakeholders across the country. Over the years, Dr. Luis has been actively involved in connecting Philippine hospitals and medical device companies with international partners, with a particular focus on Asia-Pacific collaboration and the adoption of innovative healthcare technologies. He frequently participates as a speaker and resource person on topics related to medical device industry trends, regulatory environments, and hospital procurement in Southeast Asia.

As Chairman, Dr. Luis represents MDAP in engagements with hospital groups, government agencies, and international event organizers to promote responsible and sustainable growth of the medical device sector in the Philippines. Under his leadership, MDAP advocates for better access to high-quality medical technologies, supports dialogue on regulatory and reimbursement issues, and encourages collaboration between local distributors, healthcare providers, and global manufacturers.

About the Organization

The Medical Device Association of the Philippines (MDAP) is an industry association representing companies involved in the importation, distribution, manufacturing, and servicing of medical devices, diagnostics, and healthcare technologies in the Philippines. Its members work closely with hospitals, clinics, and government institutions to support safe, compliant, and cost-effective adoption of medical equipment nationwide. MDAP actively participates in international exhibitions and hosted buyer programs to create new business linkages and to introduce advanced medical technologies to the Philippine healthcare market.
